

For many people in the developing countries like Tanzania, walking is their primary mode of transportation. Add the challenge of distance and seemingly simple tasks become difficult and sometimes impossible. With no choice but to walk, meeting everyday needs is a struggle against time and fatigue. When you provide a bicycle, you empower people with the opportunity try to make

choices. Over time, bicycles enrich the lives of children, households, and entire communities. Frequently there just is not a public transport system, especially in remote, rural areas, or they cannot afford it.

It is well cited in academic literature that cycling leads to an increased sense of freedom, independence and money savings as well as improvements to both physical health and well-being. However, it is less well documented how cycling can impact the life of people in Tanzania. Our own monitoring and evaluation activities are therefore critical to understand our unique impact to improve and tailor our service delivery to the benefit of the people we support.

As a non-profitable organization based on community development, empowering and improving the living standards of the people. We have set our objectives that will be achieved from the bicycle project;

### **Main Objectives;**

- To empower women and girls through breaking some of the cultural norms that women or girls are not allowed to own or use a bicycle
- To reduce poverty, encouraged education and provide means of transport for those in the deprived communities where no or less access to public transport
- Create job opportunities for the unemployed youth and unprivileged people in the community

- Empowering people within our community by providing access to affordable and sustainable transportation
- Strengthen our community by providing an inclusive, vibrant and supportive workshop environment for people from specific backgrounds to come and work alongside one another
- Deliver an educational experience for all by creating opportunities to learn and develop lifelong bicycle maintenance skills to generate income and reduce poverty
- Promote sustainability by saving bicycles and their working parts from landfill, encouraging reuse wherever possible, and offering an alternative way to reduce pollution and effects of climate change
- To reduce the number of rape cases for schoolgirls and molestation among boys and young teenagers
